From the womb to the moment we die we are surrounded by sound, and what we hear can either energize or deplete our nervous systems. It is no exaggeration to say that what goes into our ears can harm us or heal us. Joshua Leeds--a pioneer in the application of music for health, learning, and productivity--explains how sound can be a powerful ally. He explores chronic sensory overload and how auditory dysfunction often results in difficulties with learning and social interactions. He offers innovative techniques designed to invigorate auditory skills and provide balanced sonic environments. In this revised and updated edition of The Power of Sound, Leeds includes current research, extensive resources, analysis of the maturing field of soundwork and a look at the effect of sound on animals. He also provides a new 75-minute CD of psychoacoustically designed classical music for a direct experience of the effect of simplified sound on the nervous system.
